# Respirometric BOD secure, easy, convenient

OXITOP®-IDS

## BOD Measurement - Easy and convenient

- No need to convert data direct input of sample volume
- Most reliable results display of the curve at the head
- Full information interim values always available

Oxitop®-IDS

Oxitop®- I G

Oxitop®-IB

#### Up-to-date BOD Measurement

The new OxiTop®-i is a modern easy-to-use instrument for BOD measurement (Biochemical Oxygen Demand). The duration can be defined between one and seven days.

The sample volume can be selected in the menu. The conversion into the corrseponding BOD value will be automatic, error-free and convenient. A small LED informs about the actual operating condition of the head.

#### Unmistakable

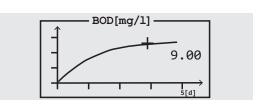

The heads with two colors in a modern design with adjustable numeric sample ID support the distinction between inlet and outlet.

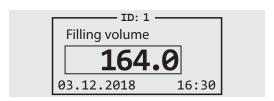

#### Display

A modern graphic display supports the input and provides multiple information.

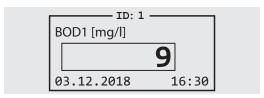

- Display of the curve
- Selection of the sample volume
- Call-up of interim values

Head with curve representation: BOD curve after 5
